Spit Tobacco Talking Points

Here are some talking points to bring up at tobacco sampling booths or rodeo committees. History shows tobacco companies normally shut down when confronted with questions.

1. How do you justify giving away Spit Tobacco containing 28-CANCER causing agents?
2. Spit Tobacco users are 50-times more likely to get oral Cancer than non-users.
3. Organized Rodeo began in 1888 in Prescott, Arizona - Tobacco companies have officially been involved since 1986 - why do you claim to be part of rodeo/bullriding after such a short time?
4. Why are you exposing your products and logo to youth during the rodeo/bullriding event?
5. Why does spit tobacco add dangerous chemicals like formaldehyde (embalming fluid) cadmium (used in car batteries) and polonium 210 (form of nuclear waste) to your product?
6. There is increasing evidence that spit-tobacco leads to a higher incidence of high blood pressure & heart disease - why are you still distributing your product to the public?
7. How much are you paying the rodeo to display this tobacco product?
8. There are no verifiable benefits to your product - why do you promote it here?
