

Hello my name is _____ and

I'm calling from the Monterey County Health Department

We're gathering information for a project on smoking.

I'd like to ask you a few questions that will only take a couple of minutes.

I'd like to start by confirming the name of your business.

Is your business name _____?

(Refer to the contact sheet for business information.)

If people ask what this is for, say: "We're gathering information for a project on smoking. I can have someone call you to discuss how the information is going to be used, if you'd like."

That's all the questions. Thank you very much for your time.
